These are the step-by-step instructions to download, install and use VOLA softwares for timing races. If you follow the instructions and still have technical difficulties running the program, please contact your informatic specialists first. If you believe that there is something wrong with this file, please let us know at the following adress : vola@vola.fr. Thank you.

It is recommended you read these instructions completely and close all software applications before starting this installation process. The instructions are divided into several sections that you can find above.

|---|---|---|------------|
| | 12/09/2012 | www.vola.fr timing@vola.fr | |

Step 13 :

Extended Version: If you have purchased a licence key for <Jumping-Pro> <Extended>, a USB software protection key should have been shipped to you.

If this is the case, plug it now into a USB port of your computer.

Step 14 :

Click on the shortcut for <Jumping-Pro> to start the software. If you have plugged no protection key, it will run in <Free> mode. This mode is adapted to simple kind of races : access to timing devices and scoreboards is restricted according to current software agreement, data management limited (limited infos on riders and horses, no filter, exports limited to pdf format, no data sending to <Video-Jumping-Pro> and <Live-Jumping-Pro>).

If you have plugged a protection key, the <Extended> mode will run as below :

<u>Step 15:</u> Choose the language you want to use.

<u>Step 16</u>: The software has now been launched. Go on «Local configuration» and choose «Timer» to check if your timing device is well recognized.

<u>Step 17</u>: Choose your timing device in the list.

X

🕜 Ok

TAG Heuer and ALGE timing devices work directly with VOLA software in <Free> mode.

For the other timing brands, you must run software in <Extended> mode. For that, you have to purchase a dongle which will unlock the software.

Check the communication port where you have connected your timing device : COM port (port number), USB (USB Driver on CD-ROM) or Ethernet (IP address). If you don't know which communication port is used, find the answer in the document «Frequent questions for Ski PRO» which is downloadable on www.vola.fr.

<u>Step 18</u>: In the previous window, click on button «Test Timer» which will bring you to the following window.

Here, you should have your timing device recognized provided that it is connected and turned on. If your timing device is not recognized, a red square will appear as below.

In this case, close this window, check the connection (see Step 17) and click again on the button «Test Timer». The test window opens, you can then transmit impulse timing data from the timer to the computer, then click on «OK».

| Jumping-Pro-Doc-En Doc version 3.1.A 12/09/2012 | VOLA RACING 37 avenue de Saint-Martin F-74190 PASSY FRANCE www.vola.fr timing@vola.fr | Page 10 / 37 |
|---|---|--------------|
|---|---|--------------|

<u>Step 19:</u> You are now back to the timing device connection. If everything looks correct for you and if the «timing device test» has worked, click on «OK». If your timing device is not recognized, don't try to go forward but check again its plugging configuration.

| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |

<u>Step 21:</u> The window below will open. Check the square on the left of «Hardware protection key». If this square is green, your dongle is well recognized. If the square is red, your dongle is not connected and the software is locked in <Free> mode.

| | Free | Extended |
|---|------|----------|
| umping Pro | 0 | Ø _ |
| isplay Jumping Pro | - | × |
| ideo Jumping Pro | 2 | Ø _ |
| ideo-Jumping-Pro works only v Hardware protect | | i mode |

The green light here shows that one dongle protection is connected.

The only red cross means that the dongle is not coded to unlock <Display-Jumping-Pro>

But the two green lights are showing that the dongle is coded for <Jumping-Pro> and <Video-Jumping-Pro>.

<u>Step 22:</u> You have now checked your timing devices and if needed your dongle protection. It's time to open a competition by clicking on the big icon «Open a competition». The window below will open and you will have the choice to open an existing competition or to create a new one.

| × | Select Competition | |

=> After each of these filters you will have to click on button «Ok» to view the filtered selection, and then making sure the check-box «Filter» is still checked, click on button «All» to add the whole selection to your competition horses list.

=> You can also save this filter to a .flt file in order to reuse it by clicking on button «Save», or load an already saved filter by clicking on button «Load». Choose the wished .flt file.

=> Simultaneously to your completing the filter, the «Selection» field indicates how much horses are retrieved for the current filter (or filters combination).

| Jumping-Pro-Doc-En Doc version 3.1.A 12/09/2012 | VOLA RACING 37 avenue de Saint-Martin F-74190 PASSY FRANCE www.vola.fr timing@vola.fr | Page 18 / 37 |
|---|---|--------------|
|---|---|--------------|

Step 31 : When you click on the «Manage horses» section and select the «Option» button, you can also choose :

- to setup the «Horse Directory» which corresponds for example to the columns in the grid listing the horses. If you think that an information is not relevant for your competition you can uncheck it in this «Horse Directory» window :

| | | Title | Active |
|-------------|--|--------|----------|
| Horse | Alpha Maximum length : 30 | Horse | <u></u> |
| Sire Number | Alpha Maximum length : 10 | N°SIRE | 0 |
| ELID | Alpha (Special) Maximum length : 10 | FEI ID | 0 |
| Vation | Alpha Maximum length : 5 | Nation | 0 |
| Gender | Predefined Values | Gender | (|
| Age | Numerical Decimal Value : 0 | Size | 0 |
| Size | Numerical Decimal Value : 0 | Size | 0 |
| Breed | Alpha Maximum length : 30 | Breed | 0 |
| Dress | Alpha Maximum length : 30 | Dress | 0 |
| Points | Numerical Decimal Value : 2 | Points | 0 |
| Prize | Numerical Decimal Value : 2 | Prize | 0 |
| Dwner | Alpha Maximum length : 30 | Owner | 0 |

- to «Format a field» :

For example reducing upper case words to lower case with the first letter in capital, or to replace the word «LOGRONNAISE» by «LOGRONESE», etc. Click on button «Ok» to apply this layout : this can be useful for the edits presentation and for the grid-lists clarity in the software too.

| Poney | • | Mère | | |
|--|------|--------------|------------------------------------|---|
| - Format O All in Lower Case O Captialize 1st Letter | Ø ok | | n Lower Case tialize 1st Letter | |
| All in Upper Case Replace | | C All in | n Upper Case | |
| Replace : | ⊘ Ok | | | |
| Options | | - Options | | |
| Copy from another Field | 🐼 Ok | Copy from an | other Field | • |

- to print the list of horses with a customized layout by clicking on «Print labels» :

you can add :

=> a background image : if you wish it to be a watermark choose a transparent image or modify it in an image editor => information on the horses : Name. SIRE Number, Mother, etc.

By clicking on button «Preview» or «Print» you can then select the sort order for this list of horses you would want to print.

| Jumping-Pro-Doc-En | | Page 10 / 27 |
|---------------------------------|--|--------------|
| Doc version 3.1.A 12/09/2012 | 37 avenue de Saint-Martin F-74190 PASSY FRANCE www.vola.fr timing@vola.fr | Page 19 / 37 |

- to «Delete horses»

that is to say to delete a selection of horses made through a filter.

<u>Step 32</u>: Click on the link «Manage Riders».

Managing riders list is quite similar to the horses list management excepting these differences :

- License : with no <Jumping-Pro><Extended> dongle the only available data for riders will be :

- the Title
- the First Name («Nom»)
- the Last Name («Prénom»)
- the License
- the Category
- Junior/senior
- the Club.

- there is a supplementary menu available in the «Option» button : «Categories» in which you can set up the categories for your competition; you can save these to a .cat file.

| Titre | Année Min | Année Max | Catégorie |
|-----------|-----------|-----------|------------|
| Mr. + Ms. | 1982 | | Senior |
| Mr. + Ms. | 0 | 1 | |
| Mr. + Ms. | | | |
| M M- | | | |
| Load | Save Dpda | | Ok 🛛 🙆 Car |

License : The basic preview enables you to print this list in a PDF file. With a <Jumping-Pro×Extended> dongle you can export in an Excel file, Text file, HTML file or launch a FTP Transfer too.

| | Horse List | | | | | × | |
|--|---------------------------|---|--|---|--------|--|---|
| Setup the output layout : title, header, number of lines, columns :> Select the fields you wish to publish and setup their layout. You can write here a note | - Documen Title : X | Format | Number Number of Lines on th Alignment Left Left Left Left Left | of Columns : 1 he 1st page : Width 24 10 10 6 10 | | Close Close Clos | < click here to preview or export a pdf file. < click here for other exports. < you can divide the edited list according to filters : see below for explanation. |
| that will appear at the> end of the list edition. | - Signat | Left | Center 🗸 | Right | • | | for signatures at dition bottom. |
| Choose the order in which horses will be sorted in this edition> | | Group fields for horses Group fields for riders Display in bold change Display in bold number t Order : Poney | added | From 1st to |) last | | |

=> Applying filters : example of a gender division presentation :

- in the «Horse List» window, click on the «filter-icon» button in the «Apply filters» group-box.

- the «Filter list» window opens; in this window grid a line will correspond to a division in your edition.

example of a gender division : create a first division for males by clicking on button
 «New», then choose «Sexe» in the first combo-box and then the symbol « = » and pick
 «Male» in the right combo-box.

Then create a division for females by clicking on «New», choose «Sexe» again, symbol « = », and «Female».

Here is the «Filter list» you should then obtain :

| Fields and Crite | nion | | | | New (F1) | 1 Sexe : Male | 11/70 |
|------------------|--|------------------------------------|--------------|----------|----------|-----------------|-------|
| Sexe | | Eemale | | | | 2 Sexe : Female | 31/70 |
| | ust be respected of the criterion must be respec : 31/70 | ted Filter Title: Sexe : Female | _/ | <u>N</u> | Options | | |
| 🧳 Load | Save | | Ok Ok Cancel | | ł | | |
| | IGREC DI | Group fields for horses | | | Load | Save | 🕜 Ok |

Then if you click on «Preview» you should see your horses list divided according to the filter list as below :

<u>Step 34 :</u> You can make other edits too :

by clicking on link «Riders List» : setting up this edition is exactly similar to the «Horses List»,
 in link «Other edits and utils ...», you have :

* «Horse List to be checked» where you can list the horses that should be checked : same as «Horses List» without filters or sorting options

* «Tournament» : this edition is useful at any time during the competition to publish the current best rider or best horse

- * the choice to «Delete an Event»
- * the possibility to export the competition to an equestrian federation among : --> FEI (Excel, XML)
 - --> FFE : a Text file is generated that you will have to send to the federation
 - --> FFE-SIF : a Text file is generated that you will have to send to the federation and society

=> Exporting the competition to the FEI :

After having clicked on link «Other edits and utils», and chosen «Export the competition», the window «Export the competition» is opened. Then select «FEI» in combo-box «Type» and click on button «Export».

- with the Excel / OpenOffice format :

first, open the .xlsm file «Jumping Result Form for FEI Family» either in Excel or in OpenOffice Calc.

In <Jumping-Pro>, clicking on button «Export», choose «Copy for Excel». In the window that opens, choose the Event you want to export to FEI :

An information window then invites you to switch to the Excel (or OpenOffice Calc) file and click on the first empty cell and then press simultaneously the key «Ctrl» and the key «V» on your keyboard to paste the exportation in this file : be careful to accomplish the paste operation before clicking on button «Ok» in the information window :

| Type : FEI | - Export | Ose Close |
|---------------------------|--|----------------------------|
| Export FEI | | |
| Event to export : 1 | | |
| Event exported | | |
| To finish the exportation | click on the first cell of the Excel file and press CTRL+V (Paste) | |
| | Excel file and press CTRL+V (Paste) | Ful han Details RL+V |

Example with the Result Form file opened in OpenOffice Calc :

After pressing «Ctrl + V», the spreadsheet software opens a setup and preview window; you should here keep the default parameters except for the separator option where you will have to check the check-box for «tabulation» as below :

| Jumping_Results_Form_1.0.9.xlsm - OpenOffice.org C | Calc | |

| | | | | | | | | | | | | | |
| | | i | | | | | | | | i | | | |

Assign a number to the composed couple in this box «Num».

For each couple validate with button «Ok».

<u>Step 40 :</u> Click now on the link «Timing». The window will change to a blue background.

| Jumping-Pro-Doc-En Doc version 3.1.A 12/09/2012 | VOLA RACING 37 avenue de Saint-Martin F-74190 PASSY FRANCE www.vola.fr timing@vola.fr | Page 27 / 37 |
|---|---|--------------|
|---|---|--------------|

Step 41 :

You have first to create the start list. Click on button

«Start list» and the window below will open. You can prepare a start list from the competitors' list or from the first rounds results or from another event ranking or start list, etc. For a standard timing (1st event), choose «prepare with competitors».

Step 44 :

Jumping-Pro-Doc-En

Doc version 3.1.A

12/09/2012

Just after creating the start list, it is usually printed for placarding it publicly. For that, click on the link «Start list» in the left column.

You will have to choose the round.

Then you can configure the start list columns as you want.

You can see the result by clicking on «Preview» and print the list too.

www.vola.fr

VOLA

Concerning the filters, they won't modify the start list you have elaborated but they allow you to re-arrange the presentation of the start list for publishing it.

For example, you may want to divide the start list according to the club of the rider, so that in each club they will know in which order their riders will compete. In the window below, the third filter has been made by clicking on button «New» then choosing «Rider: Club» + « = » + «PASSY».

| | | | |

<u>Step 46 :</u>

Here you have entered the timing section which is presented as below.

Important : to have the computer and the timing device synchronized, you will have to get an impulse before the first run of the first Event and when you are in the «Timing» section but without any start armed.

| Jumping-Pro-Doc-En Doc version 3.1.A 12/09/2012 | VOLA RACING 37 avenue de Saint-Martin F-74190 PASSY FRANCE www.vola.fr timing@vola.fr | Page 31 / 37 |
|---|---|--------------|
|---|---|--------------|

<u>Step 47 :</u>

Present a competitor : when a competing couple is publicly

announced (for example by the jury president or the speaker) click on button «Ready to Start» the first competitor in the list order should be displayed in a pop-up window :

(you can also double-click on the competitor's name in the start list) :

Be aware that if a scoreboard is plugged to your computer, the information for this competitor couple will be displayed when you click on button «Ok» of this pop-up window. So that's the time when the public will see those.

And the red square for start will then be flashing red and yellow.

<u>Step 48 :</u>

Start the countdown simultaneously with the ringing of the official bell by clicking on the button with the icon of a clock marked «45'». The countdown will be running as below :

| S Timing - Event N°5 / Prix des pays du Mont Blanc | | - 0 × |
|--|---|-------------------|

| Scoreboard | | |

Note : you can suspend the countdown by clicking again on the clock-icon button. Restart by clicking again on it.

| Jumping-Pro-Doc-En Doc version 3.1.A 12/09/2012 | VOLA RACING 37 avenue de Saint-Martin F-74190 PASSY FRANCE www.vola.fr timing@vola.fr | Page 32/ 37 |
|---|---|-------------|
|---|---|-------------|

<u>Step 49 :</u>

Arm the start by clicking on button «Arm Start». The square for start will then turn to still green.

To avoid false impulse arm start when you are sure that only the current competitor will create an impulse in the start detector.

Step 51 :

Check the penalties and door numbers. Verify with the jury that you have noted the same faults on the same door numbers. This can be done at any time, most often during the round in fact.

Example of a 4 points penalty on door 7 :

- first get sure that the cell under number 7 in grid «Obstacle and Refusal Grids» is selected;

- several manners : you can either double-click on this cell, or click on button «4», or press keyboard «F2», or click on button «+» next to edit-box «Course Points» and in the pop-up window raised type 4 and validate with «Ok».

<u>Step 54 :</u>

Here you are back to the «Timing» management section. You can see the ranking of the round.

If you noted a difference with the jury notes, check the penalties with button «Modify Information» below :

<u> Step 55 :</u>

Adjust the information so as to agree with the jury final decision. Example below : adding a penalty of 4 points.

Step 56 :

You can see the ranking of the round by clicking on link «Round ranking».

In the opening window you will have the possibility to configure your round ranking. You can define the information you want to display such as «Rank», Names : «Horse: Poney» and «Rider: Cavalier», ...

Then click on «Preview» to see it, or «Print» or «Export» according to your needs.
